

Claims: I claim:

1. A scoring banner comprising:

a front face and a back face coupled together and of the type comprising a sheet of lightweight, flexible first material capable of being repeatedly bent and straightened out without fracturing and of sufficient size to accommodate the display of a team insignia;

means for supporting a plurality of scoring elements of the type comprising a sheet of lightweight, flexible second material capable of being repeatedly bent and straightened out without fracturing,

means for displaying said scoring elements on said front face and said back face,

means for positioning said scoring elements into a plurality of scoring symbol displays,

means for attaching said scoring banner to a variety of support structures,

means for rolling up and securing said scoring banner into a relatively compact cylindrical configuration for storage and transportation,

whereby a sport's team may attach said scoring banner to a variety of support structures, display a team's insignia and opposing team scores and roll and secure said scoring banner into a compact and cylindrical form for easy storage and transportation.

2. The scoring banner in claim 1 further comprising at least one utility storage pocket of the type comprising a sheet of flexible third material capable of being repeatedly bent and straightened out without fracturing;

means to organize, hold and display form fitting items.

Patent Application of John J. Huber for "Banner Scoring Device"

3. The scoring banner in claim 1 further comprising at least one equipment storage loop of the type comprising a sheet of lightweight, flexible fourth material capable of being repeatedly bent and straightened without fracturing;

means to hang a baseball bat wherein baseball bat is supported in a vertical position,

means to attach a hooking device wherein items may be attached.

4. The scoring banner in claim 1 further comprising of at least one sound device.

5. The scoring banner of claim 1 further comprising a means to display at least one team mascot toy.

6. The scoring banner in claim 1 further comprising at least one transparent pocket of the type comprising a sheet of lightweight, flexible fifth material capable of being repeatedly bent and straightened without fracturing;

means to hold and protect a variety of signs and displays.

7. The scoring banner of claim 1 comprising a linear passageway formed between and parallel to the top portion of said front face and said back face;

means to stiffen the coupling of said front face and said back face.

8. The scoring banner of claim 1 comprising a plurality of ground anchoring rods inserted into a plurality of linear passageways formed between and parallel to the side portion of said front face and said back face;

means to anchor said scoring banner to the ground.
